Power Off Use Case - UC05

This case shows the user turning off the device by pressing the power button

```
   User            PowerButton        MainWindow
    |                   |                  |
    |      press()      |                  |
    |------------------>|                  |
    |                   | changePowerStatus()
    |                   |----------------->|
    |                   |                  |
```
